

Program: Human Biology

Academic Program Assessment Plan (2017-2018)

1. Which outcomes will you assess this year (2017-2018)?

1. Demonstrate an appreciation for the ethical and social dimensions of science, as well as weaknesses / limitations and assumptions of science as practiced in the United States.
2. Demonstrate the awareness, understanding and skills necessary to work in a diverse world.

2. Which technique will you use to assess this outcome?

Embedded assessment techniques including, tests, student posters etc.

3. Which course or group of students will you assess on the outcome chosen above and when?

Human Biology majors taking HUB 318 (Reproductive Biology) and HUB 204 (Anatomy and Physiology) will be utilized to assess learning outcome 1 during the spring 2018 term.

Human Biology majors taking NUT SCI 421 (Community Nutrition) will be utilized to assess learning outcome 2 during the fall 2017 term.
